

We now offer a fun and enriching full-day program for School-age children while assisting with their elementary education. Our program works great for parents that need assistance with distant learning but may not have the time or freedom to make that possible. Our distant learning schedule will follow Selah School District that includes, free play, learning with teacher through live video (synchronous learning), outside play, lunch, and independent work (Asynchronous learning). We will also be providing care for students out of district until Selah Schools return to in classroom instruction. Please call 698-Kids(5437) for more information.
